this volume continues to build on the relationship between the research in management consulting series and the
intervener researchers at the socio economic institute for firms and organizations iseor in ecully france extending that
partnership to our recent work with the french foundation for management education fnege a foundation dedicated to
closing the gap between the teaching and practice of management in france as part of the foundation s multifaceted
activities which range from seminars and an advanced training initiative for french doctoral students to joint programs with
international organizations an associations fnege partnered with iseor to sponsor a series of workshops on developing high
quality intervention research this volume is one of the results from that endeavor although intervention research helps to
uncover valuable insight into organizational dynamics and performance the challenge of capturing and disseminating that

insight to both academics and practitioners is entrenched in the rigor relevance debate while we are witnessing increased calls for actionable knowledge this ideal unfortunately remains a rather elusive concept as critics contend either that rigorous academic research falls well short of relevance to the practitioner world or research that proves to be valuable to practitioners falls short of the rigor expected in academic life this volume is intended to help bridge that divide drawing on the fnege iseor intervention research workshop the volume contains 18 chapters that explore the intervention research process from initial conceptualization to implementation to publication the volume will be published in french and english

this volume contains papers and reports from the conference held in romania june 2000 the book covers many topics for example place role and content of geotechnical engineering in civil environmental and earthquake engineering
